(re)MIND® is a program of Felton Institute, formerly known as Prevention and Recovery in Early Psychosis (PREP).

(re)MIND® is committed to transforming the treatment and perception of early psychosis by intervening early with evidence-based, culturally competent assessment, diagnosis and specialized treatment. With (re)MIND®, young people can learn skills to manage the ups and downs of psychosis.

If you or someone you know might benefit from (re)MIND®, check us out at
