(re)MIND® is a coordinated specialty care model for early detection and treatment of psychosis. The (re)MIND® program applies an array of evidence-based practices to support individuals and their families in realizing their full potential.

To be eligible for (re)MIND®, participants must:

- Be a San Mateo County resident (regardless of insurance status)
- Have began experiencing signs and symptoms of psychosis within the past two years
- Be 14-35 years old

(re)MIND® is committed to transforming the treatment and perception of early psychosis by intervening early with evidence-based, culturally competent assessment, diagnosis and specialized treatment. With (re)MIND®, young people can learn skills to manage the ups and downs of psychosis.

If you or someone you know might benefit from (re)MIND®, check us out at [feltonearlypsychosis.org](http://feltonearlypsychosis.org) or call (650) 458-0026 for information or referral.
