After an initial screening to check if BEAM UP® services are a good fit, a clinician will conduct a rigorous, research-validated diagnostic assessment. Appointments can be scheduled at the BEAM UP® office or another convenient, private location.

With early detection and intervention, schizophrenia and other psychotic syndromes are preventable.

The Felton BEAM UP® team understands how to prevent psychosis and is here to support teens, young adults and their loved ones through the entire process.

BEAM UP® Services Include:

• Rigorous, Research-Validated Diagnostic Assessment
• Individual Psychotherapy with Cognitive Behavioral Therapy for Psychosis (CBTp)
• Strength-Based Care Management
• Employment and Education Support
• Algorithm-Based Medication Support
• Multi-Family Groups
• Peer and Family Support
• Integrated Substance Use Treatment
• Community Outreach and Education

If a teen or young adult you know is behaving differently and/or feeling distressed by recent unexplained:

• Unusual thoughts and beliefs
• Sensitivity to light or sounds
• Social withdrawal
• Trouble organizing thoughts or speech

- OR -

• A first degree relative with a history of psychosis

- AND -

• A recent decline in age-appropriate functioning

They may be experiencing symptoms suggesting a high risk for developing psychosis.

A BEAM UP® assessment is the first step.
