WE CAN HELP

BEAM UP® is a coordinated specialty care model designed to enable youth and young adults to navigate their transition to independence and prevent the potential impact that mental illness can have on it. The BEAM UP® program applies an array of services to support these individuals and their families in realizing their full potential.

To be eligible for BEAM UP®, participants must:

- Be a San Francisco County resident (regardless of insurance status)
- Be experiencing recent trouble with perception, thoughts, mood, or functioning
- Be 14-25 years old

BEAM UP® is a program of Felton Institute.

BEAM UP® is committed to transforming the perception of mental health through science, education, and hope. By intervening early with evidence-based, culturally competent assessment and specialized treatment, mental illness can be prevented or mitigated. With BEAM UP®, young people can learn skills to prevent serious mental illness from developing in the first place.

If you or someone you know might benefit from BEAM UP®, check us out at feltonearlypsychosis.org or call (415) 614-5970 for information or referral.
