(re)MIND® is a program of Felton Institute, formerly known as Prevention and Recovery in Early Psychosis (PREP).

(re)MIND® is committed to transforming the treatment and perception of early psychosis by intervening early with evidence-based, culturally competent assessment, diagnosis and specialized treatment. With (re)MIND®, young people can learn skills to manage the ups and downs of psychosis.

If you or someone you know might benefit from (re)MIND®, check us out at feltonearlypsychosis.org or call (415) 614-5970 for information or referral

We Can Help

(re)MIND® is a coordinated specialty care model for early detection and treatment of psychosis. The (re)MIND® program applies an array of evidence-based practices to support individuals and their families in realizing their full potential.

To be eligible for (re)MIND®, participants must:

• Be a San Francisco County resident (regardless of insurance status)

• Have begun experiencing signs and symptoms of psychosis within the past five years

• Be 14-35 years old
